CAREER OBJECTIVE

AI & Data Science undergraduate with hands-on experience in Python, computer vision, YOLO, OpenCV, and AI-based application development. Currently strengthening Python and machine learning fundamentals through structured project-based learning. Developed SafeGuard AI, an AI-powered vehicle accident detection and emergency response prototype integrating computer vision, voice verification, location services, and emergency communication. Seeking an internship in AI/ML, Computer Vision, Python Development, or Data Science.

TECHNICAL SKILLS

Programming:	Python, C/C++
AI & Computer Vision:	YOLO, OpenCV, Computer Vision, Pose Estimation, Object Detection
Data Science & ML:	NumPy, Pandas, Basic Machine Learning
Developer Tools:	Git, GitHub, VS Code, Linux/Ubuntu
Frameworks & APIs:	Tkinter, REST APIs

PROJECTS

SafeGuard AI – AI-Powered Vehicle Accident Detection & Emergency Response System

- Developed a Python-based AI safety prototype designed to detect potential vehicle accidents and initiate an automated emergency-response workflow.
- Implemented **YOLO-based object and pose detection** with OpenCV for real-world visual analysis and rider-state assessment.
- Designed a multi-stage accident verification workflow using movement, posture, and indicators to minimize false emergency alerts.
- Integrated voice-based rider verification to determine whether the rider can respond following a suspected accident event.
- Developed functional modules for location acquisition, hospital identification, emergency evidence generation, and automated communication.
- Built a **Tkinter-based live monitoring dashboard** to track detection status, rider verification states, and emergency response workflows.
- Tech Stack:** Python, YOLO, OpenCV, Computer Vision, Tkinter, GNSS/GPS, AI/ML

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Expected Graduation: 2029

N. K. Orchid College of Engineering & Technology, Solapur

CGPA: 9.45 / 10.0 | **Minor:** Mechanical Engineering

WORKSHOPS & CONTINUOUS LEARNING

- 100 Days of Code: Python Learning Journey** (Active Learner - 50+ Days Completed): Completed rigorous daily coding modules covering core Python programming, Object-Oriented Programming (OOP), file handling, APIs, and automation scripts.
- National Intellectual Property Awareness Mission (NIPAM 2.0)** (Participant): Completed specialized workshop training focused on intellectual property rights, patents, and innovation frameworks.
